

## Application Form – Financial support for grant applications

Side 1/3

As part of SDC's strategy 2020-25, the Danish SDC office wants to support initiatives that attract external research funding for Sino-Danish research projects within the SDC. The Danish SDC-office thus provides financial support for applications for research funding from research councils, grants, etc. with application deadline in 2023 to researchers from Danish universities already affiliated with SDC.

The financial support from the SDC-office amounts to DKK 50,000.

Financial support from the SDC office is independent of whether the application is eventually successful, and a grant is awarded, i.e., it is provided based on a submitted research application that meets the requirements of the research council.

The SDC office provides financial support based on the following requirements:

- The research project must involve partners from at least two Danish universities, including the main applicant's university.
- The research project must involve Chinese partners with active participation in SDC, i.e. CAS-institutes or Chinese universities/institutions with formal ties to SDC.
- Only the main applicant of a research funding application can apply the SDC-office for financial support.
- If the research application is successful, the main applicant must assist the SDC office with publicity, e.g. in the form of an interview, contribute to a newspaper article, a bulletin on SDC's website, etc.

The relevant research support unit (forskningsstøtteenhed) at the main applicant's university should preferably be involved in the application for research funding.

To apply for financial support from the SDC office, fill-in the following application form and send it to [contact@sdc.university](mailto:contact@sdc.university). The application to the SDC office must be approved by the Danish Principal Coordinator before the Danish SDC Director makes the final approval.

## GENERAL INFORMATION OF APPLICANT/PROJECT RESPONSIBLE
